

Expression of Concern

NO AUTHORS LISTED

The Editor in Chief and the Publisher are issuing an expression of concern to alert readers to the fact that the following articles are under investigation due to concerns raised regarding non-verifiable nucleotide sequences and cell lines used in the following articles:

- Shi YX, Ye BL, Hu BR, Ruan XJ. Expression of miR-1294 is downregulated and predicts a poor prognosis in gastric cancer. *Eur Rev Med Pharmacol Sci* 2018; 22 (17): 5525-5530–DOI: 10.26355/eurrev_201809_15813–PMID: 30229824.
- Dong SR, Ju XL, Yang WZ. STAT5A reprograms fatty acid metabolism and promotes tumorigenesis of gastric cancer cells. *Eur Rev Med Pharmacol Sci* 2019; 23 (19): 8360-8370–DOI: 10.26355/eurrev_201910_19147–PMID: 31646566.
- Chen J, Yuan ZH, Hou XH, Shi MH, Jiang R. LINC01116 promotes the proliferation and inhibits the apoptosis of gastric cancer cells. *Eur Rev Med Pharmacol Sci* 2020; 24 (4): 1807-1814–DOI: 10.26355/eurrev_202002_20358–PMID: 32141549.

Further updates will be provided once the investigation is completed.

The authors have been notified about this expression of concern.
