Anesthesiology and Reanimation, Bursa Uludag University Faculty of Medicine Hospital, Bursa, Turkey

Correction to: Eur Rev Med Pharmacol Sci 2021; 25 (18): 5801-5806–DOI: 10.26355/eurrev\_202109\_26798–PMID: 34604971 published online on September 30, 2021.

The methodology section of this research article incorrectly stated that the lexi-interact checker program is freely accessible. The study was conducted at Uludağ University using university-access computers. As a result, the lexi-interact program, provided through UpToDate and accessed *via* the university's subscription service, was mistakenly described as a free resource.

Therefore, the sentence “pDDIs, defined using the lexi-interact (a free online interaction checker, provided from UpToDate, 2020, <https://www.uptodate.com/drug-interactions>), were classified based on the significance of the interaction level (minor, moderate, major)” has been corrected as follows:

- pDDIs, defined using the lexi-interact (an online interaction checker, provided from UpToDate, 2020, <https://www.uptodate.com/drug-interactions>), were classified based on the significance of the interaction level (minor, moderate, major).
