Have been retracted by the Editor in Chief for misconduct and data fabrication.

In 2020, some concerns have been raised on PubPeer about the reliability of data and image duplication.

An investigation conducted by the Jining First People’s Hospital, the authors’ institution, released on December 17, 2021, and on December 29, 2021, respectively, determined that the authors had engaged in academic misconduct by fabricating the research process.

Consequently, the Editor in Chief mistrusts the results presented and has decided to withdraw the articles.

The corresponding authors did not respond to journal correspondence about the investigation and retraction of these articles.

This article has been withdrawn. The Publisher apologizes for any inconvenience this may cause.
